Business Type: R&D

IMNR is a Governmental Research Institute situated in the Bucharest-Ilfov area, the most research-intensive Romanian Region, with over 50 years of expertise in non-ferrous and inorganic materials industry. Its strategic mission is focused on developing and implementing new and emerging technologies in the field of materials engineering for use of primary and secondary non-ferrous resources, obtaining of new metallic, composite and hybrid advanced materials and nanomaterials with customized design for coatings and additive manufacturing, as well as implementation of certified testing methods for physical-chemical materials characterisation.

The institute's core activities are supported by different applied National and European research projects, including presently 7 Horizon 2020 and ERANET co-funded projects, contributing to improve the innovation capacity of businesses and government.

IMNR is a member of: 2 National Innovative clusters MAGURELE HIGH TECH, focusing on R&D and industrial opportunities generated by the ELI-NP project, and ROHEALTH, focusing on health and bioeconomy, with a total reach of approx. 100 organizations (R&D institutes, universities, NGOs, SMEs, etc.); 3 COST NETWORKS: HERALD (MP14102) - Hooking Together European Research in Atomic Layer Deposition, CRMEXTREME (CA15012) - Replacement of Critical Raw Materials for Extreme Environmental Conditions, BIONECA (CA16122) - Biomaterials and Advanced Physical Techniques for Regenerative Cardiology and Neurology; 4 EU PLATFORMS: ETP Raw Materials, EIP Raw Nanovalue, ETP Nanomedicine, JTI Nanofutures. Also, IMNR is coordinator of the European VIRTUAL Centre for Integration of INNOVATIVE synthesis and Processing methods for SUSTAINABLE advanced Materials operating under Extreme Conditions (H2020-692216-SUPERMAT). The relation between IMNR and industrial partners is managed by the Technology Transfer Center in Advanced Materials (CTT AVANMAT), member of the Romanian Network of Innovation and Technology Transfer – ReNITT.

Meeting with: Development in Construction (private and state)

Export Countries: Germany, Arab Emirates, Asia

Romania country profile

Romania, in southeast Europe, is mountainous in the north while the main feature in the south is the vast Danube valley. The river forms a delta as it approaches the Black Sea, which is a wildlife reserve for countless native and migratory birds.

The Romanian parliament consists of two chambers, the Senat (Senate), which has 140 members, and the Camera Deputaților (Chamber of Deputies), which has 345 members. The members of both chambers are chosen in elections held every four years.

Ethnically, the population is 90% Romanian and 7% Hungarian. The Romanian language, like a number of others in southern Europe, is directly descended from Latin, although Romania is separated from other Romance-language countries by Slav speakers. Romania has considerable natural resources – oil, natural gas, coal, iron, copper and bauxite. Metal-working, petrochemicals and mechanical engineering are the main industries.

Romanian specialities include grilled meatballs, pork stew with garlic and onions and doughnuts made with cream and cheese.

The spine-chilling tale of Dracula is based on the 15th century Romanian Count Vlad Dracul whose son was famous in wartime for impaling captured enemies. Well-known Romanians include the writer Eugène Ionesco, the gymnast Nadia Comaneci and the composer George Enesco.

Official name: Romania

Area (km²): 237,500

Population (resident inhabitants): 19,514,110 (2019, Mar.)
